

Corne Choc Pro — keycap legends (German · macOS)

Print on sticker foil at **100% / actual size** (turn OFF "fit to page"/"scale to fit"). Cells are 14 mm = your max stick-on area; cut on the dashed line. Keep glyphs centered — the caps are negatively curved, so edges won't lie flat. One layer per page, color-coded.

← This square must measure exactly **10 mm** after printing. If not, fix your printer scale.

● 0 · BASE ● 1 · NUM ● 2 · SYM ● 3 · NAV ● 4 · FUN ● modifiers ⌘ ⌥ ^ ⏏

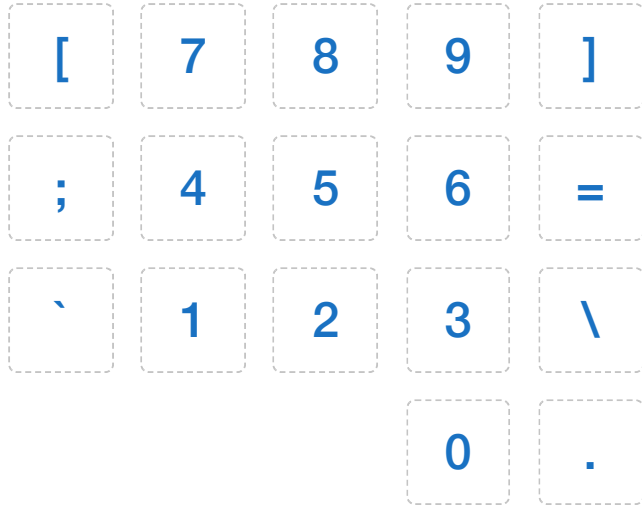

● 0 · BASE (letters)

Home-row modifiers — print these **smaller** and stick on the **front edge** of A S D F / J K L ; (not the top):

● 1 · NUM (numbers / math)

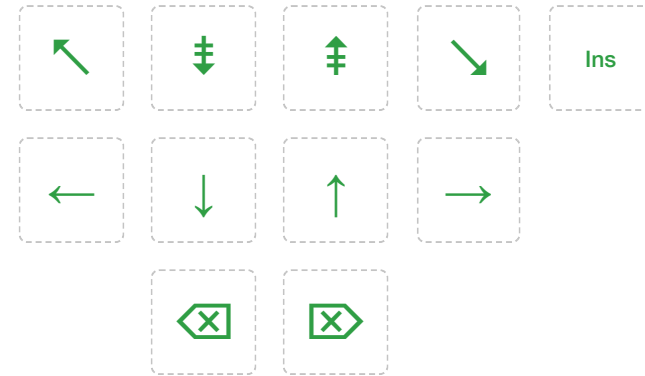

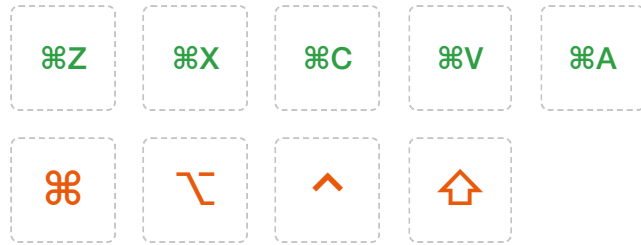

● 2 · SYM (symbols)

!	@	{	}	
#	\$	(	)	=
^	~	[	]	\

`	+	*	/	%
&	-	:	;	"
_	<	>	?	'

● 3 · NAV (navigation / editing)

● 4 · FUN (F-keys / media / system)
